Recommended Unlisted Actions:

Mr. Kaufman discussed the environmental impacts associated with a hardened shoreline and inquired as to which direction the long shore current flows.

Members went on to question the necessity of this project. Mr. Swanson stated that this project is in conflict with the New York State Department of State's coastal zone management policies and asked what has been done to obtain their approval. Mr. Bagg inquired as to the opportunity for a sand bypass program in relation to the Army Corp of Engineers inlet dredging project. The Council went on to recommend an historical review of aeriels to determine past erosion activity in the area.

Mr. Kaufman made a motion to table until the additional information requested can be submitted. The motion was seconded by Mr. Swanson. Motion carried.

OTHER BUSINESS:

CEQ Bylaws

Ms. Russo asked that the Council table this item as Mr. Swanson had to leave and he was interested in participating in the discussion.

Mr. Kaufman made a motion to table. The motion was tabled by Mr. Machtay. Motion carried.

CAC CONCERNS:

Ms. Squires inquired as to whom we discuss the status of open space acquisitions as they relate to the planning steps moratorium bill. She feels that the Town of Huntington no longer knows how to proceed with joint acquisitions. Legislator Hahn explained the impetus of the bill and the fact that the County may no longer bond for open space acquisitions and must now prioritize purchases for what little funds are left in that section of the Drinking Water Protection Program. She explained that properties that have already been approved for acquisition but have yet to close will pause while the County prioritizes. However, acquisitions will proceed as usual until the proposed legislation passes.
